

## Frankfurt Airport Center 2

### Pulsing with the Aviation and Tourism Business

The FAC 2 is integrated in Terminal 2 and therefore provides an ideal setting for companies active in the aviation and tourism sectors.

The Frankfurt Airport Center 2 opened in 1994. It shares the open, generously dimensioned architecture of Terminal 2 with the fascinating transparency of an intricate steel-and-glass structure. Its offices are characterized by a very high standard in every respect, enhanced by a magnificent view of everything that goes on at the airport. Especially appealing to companies engaged in activities related to aviation and tourism, this facility offers ideal surroundings and working conditions for airlines and other service providers.

The Frankfurt Airport Center 2 is in the D and E wings of Terminal 2, placing it in the immediate vicinity of the check-in areas with fast, direct access to the apron. A large underground garage offers ample parking. The chief advantages of being located right in Terminal 2 are the proximity of all facilities and the modern, international airport atmosphere.

Terminal 2 holds a plethora of attractive establishments for shopping and consuming food and beverages. There is also a modern canteen in the D wing of the Frankfurt Airport Center 2.

Thanks to the elevated "Sky Line" train, it takes only minutes to get to Terminal 1 with its extensive range of shops, services, bars and restaurants.
