

Restructuring of Terminal 2

Since some gates are ready and tested for the arrival of the new wide body aircraft A380, the passenger areas will be remodeled to match the challenge. In a central gallery, located between two inviting food & beverage areas, the passenger here finds international top of the range brands and a variety range of duty free products. A wellness-spa gives the additional opportunity to relax. Airport specials and promotion products highlight the marketplace and increase the shopping attractiveness.
