

Baggage

Your baggage also changes planes.

Your baggage is automatically conveyed between planes. Without requiring you to raise a finger, it is relayed to your final destination. When checking in at your original point of departure, however, we do recommend that you mention that Frankfurt will only be a stopover on your trip. This will make doubly sure that your bags will travel with you.

Tip: hand baggage carts

To roam the airport more comfortably, you can take advantage of our hand baggage carts; we have provided plenty of them in both terminals. You can even use them on the escalators. The only exception: the Sky Line shuttle between Terminals 1 and 2. When you detrain at the other terminal, you can easily grab another cart.
