

Mini Tour

Around the world in 45 minutes: with the Highlight Tour.

Spend 45 minutes exploring the apron area: unforgettable impressions that will get under your skin. We'll take you past the terminals and right out to the takeoff and landing runways. Experience the thrill of watching a jumbo weighing 400 metric tons take off at a speed of almost 300 kilometers an hour right before your eyes. Then we proceed to the cargo facility, where you'll see everything that leaves daily for other continents: from food and cars to live animals, all sorts of things are loaded here for dispatch to the other end of the world.
