

## Location with top connections

## Benefit from Maximum Mobility and Flexibility

Frankfurt Airport City offers total mobility, because it is ideally networked with air, rail and road links. It is one of the world's leading intermodal transportation hubs, located at Europe's center with outstanding connections to the entire world. Year after year, many millions of people benefit from the unique mobility, flexibility and reliability of Frankfurt Airport City.

Maximum mobility is ensured by:

- Optimum air, rail and road connections
- A large number of frequent flight connections:  
307 destinations in 109 countries, 4,635 direct connections worldwide every week.
- Direct access to Germany's most heavily trafficked motorway interchange with north/south (A5) and east/west (A3) connections.
- Direct access to the high-speed European rail network operated by German Rail, with over 170 trains leaving daily from the long-distance train station.
- Ideal connections to the region, with over 230 trains departing daily from the regional train station.
- A separate freight railway station at CargoCity South.
- More than 14,500 parking spaces available for public use.
- Frequent passenger shuttles between the two terminals.
- Separate bus station.
