

## Investors

### **Growing success with growing enthusiasm.**

Nearly all major logistics enterprises, airlines, integrators and freight forwarders have opted for Cargo City. And investors and users alike are glad they have done so; 75 percent are satisfied with this location. Comparing it with other airports, they are especially pleased with its special facilities, on-site infrastructure, logistical processes and reliable personnel. Plus, nearly all users are looking optimistically into the future; they expect cargo volumes to continue growing. So do we. That's why we are steadfastly driving the development, marketing and optimization of Cargo City, among other things by developing additional land today in order to meet the requirements of tomorrow's growth.
